Art. Nr FP50160

FJELLPULKEN ARMY EDITION

Fjellpulken Army edition is a reinforced pulk (sled) for military use. Construction and materials have gone through testing in extreme arctic environments for long periods of time. The pulk can be used for rescue operations, transport of weapons and other military equipment. Comes with a reinforced hauling shaft made in solid fibre-glass and metal. This can be folded for transport and storage. The shaft is used together with the Fjellpulken Pro pulk harness. The belt is reinforced with a padded waist belt, cross-straps for good support on shoulders and neck. All seams are reinforced. The belt has steal D-rings for attaching the hauling shaft. The top cover is wind- and waterproof and handmade. Easy to replace spare parts if necessary.

The pulk can be pulled with skis, snowshoes or attached to a snowmobile for longer transports. The Fjellpulken 200 cm Army is a both MedEvac and equipment pulk.
